

Product Information

Neatcut 32

Description

Neatcut 32 is a blend of highly refined mineral base stocks, which incorporate a dedicated additive package which offers excellent performance in neat cutting operations. The product exhibits excellent resistance to oxidation and rust and corrosion and is non-staining to sensitive work pieces. The fluid is capable of providing excellent performance under high load conditions due to the polar extreme pressure and anti-wear additive package, providing high levels of lubricity to both tool and work piece. The product is anti-misting and low in odour giving operator acceptability.

Applications

Neatcut 32 is intended for use in neat cutting operations such as cutting, sawing and threading on a variety of ferrous and non-ferrous metals including stainless steel, the fluid is to be used neat as supplied.

Performance Features

- High levels of lubricity
- Offers long tool life
- Operator acceptability
- Resistant to oxidation
- Excellent load carrying ability
- Non-Staining
- Protection against rust and corrosion

Typical Data

Characteristic	Unit
Density @ 15.6°C	kg/l
Kinematic Viscosity @ 40°C	cSt
Flash Point (Open)	°C
Pour Point	°C

Method	Result
ASTM D4052	0.862
ASTM D445	32.0
ASTM D92	205
ASTM D97	-24
