

Product Information: Airtech ATO

Description

Airtech ATO is a high quality airline lubricant intended for the lubrication of pneumatic tools, valves and associated equipment. The product is intended for use in systems where it may be necessary to draw off separated water.

The product is inhibited to minimise thermal degradation and foaming, as well as protect against corrosion and deposit formation. The product is formulated to ensure rapid mist formation for the lubrication of downstream pneumatic equipment.

Applications

The product is designed specifically as an airline lubricant for use on pneumatic tools and may also be used as a hydraulic fluid where appropriate.

Performance Features

- Provides enhanced corrosion protection
- Readily separates from water
- May be used as a hydraulic medium for certain applications
- Circulates and penetrates rapidly into pneumatic systems
- Contains no added silicone

Typical Data

Characteristic	Unit	Result
Density @ 15.6°C	kg/l	0.847
Kinematic Viscosity @ 40°C	cSt	20.6
Kinematic Viscosity @ 100°C	cSt	4.2
Viscosity Index		108
Flashpoint (Closed)	°C	215
Pour Point	°C	-30
