

Product Information: Geartech LS 90

Description

Geartech LS 90 is a high quality gear lubricant, formulated using high quality, virgin, mineral base stocks which incorporate an advanced friction modified additive system. The lubricant displays excellent extreme pressure, anti-weld and anti-wear performance, as well as offering outstanding protection against rust and corrosion. Geartech LS 90 is formulated to deliver excellent foam control, is thermally stable and highly resistant to oxidation

Applications

Geartech LS 90 is recommended for the effective lubrication of limited slip differentials in cars and commercial vehicles where the original equipment manufacturer recommends a lubricant of this quality, performance level and viscosity. It can also be used in conventional differential configurations, where an API GL-5 lubricant is recommended.

Performance Features

- Extreme pressure properties
- Excellent anti-wear performance
- Thermally stable
- Resistant to oxidation
- Excellent foam control
- Protection against rust and corrosion
- Friction modified
- Anti-weld performance

Performance Level

API GL-5 Limited Slip

Typical Data

Characteristic	Unit	Result
Density @ 15.6°C	kg/l	0.898
Kinematic Viscosity @ 40°C	cSt	190
Kinematic Viscosity @ 100°C	cSt	17
Viscosity Index		97
Flashpoint (Closed)	°C	200
Pour Point	°C	-18
