

## CF-I Inherently Biodegradable Chain Oil

### Description

Sustain CF-I is an inherently Biodegradable lubricant, manufactured using high quality base stocks. The fluid includes special tackifiers to ensure strong adhesion to metal surfaces, hence ensuring resistance to dripping, throw-off and water spray loss.

Sustain CF-I is fortified with specially selected additives to provide outstanding resistance against wear, rust and corrosion.

The inherent biodegradable properties of this fluid make it an ideal choice for chainsaw operators working in environmentally sensitive areas.

### Application

Sustain CF-I has been formulated to protect and lubricate the chains and bars of all types of chainsaw. It may also be used on industrial chains and conveyors where a tacky fluid of this quality and viscosity are recommended. Consideration should be given to this fluid when operating chainsaws in environmentally sensitive locations.

### Typical Data

Characteristic	Unit	Result
Density @ 15.6 °C	kg/l	0.872
KV @ 40 °C	cSt	72.7
KV @ 100 °C	cSt	9.43
Viscosity Index		107
Pour Point	°C	-36
Flash Point (COC)	°C	254

### Performance Features

- Inherently Biodegradable
- Highly adhesive for reduced fling-off
- Resistant to rust and corrosion
- Excellent anti-wear characteristics
- Extended working life of equipment

\*Inherently biodegradable as according to OECD 301B, Biodegradability >30% within 28 days.
